PROJECTS

E-Caliber Inward Module

18 months

The above project is made for the handling of calibration
inward-entry.

After finished calibration user entry all calibration data like
reading, customer data etc and

here tax was automatically calculated, each and every
entry has a unique number and its

automatic generated after saved inward user can edit
inward using the unique number.

There was a calibration validity of some calibration after
finished validity user sends

calibration reminder mail to the customer so, when user click required inward all data are fetched in outlook mail user need not fill data manually and the user sends mail multiple entries at a time.

E-Caliber

18 months

The above project is made for the handling of all calibration process & its history which was done manually by using registers & old techniques earlier. It also manages communication between admin, super-user & normal users by using email. In this website, the calibration is done by two ways i.e. In-House Calibration & Out-House Calibration. By using this website, maintaining the records of each calibration types with communication to each other became very easy.

ERP

18 months

The above project is ERP of the manufacturing company. It has 3 module i.e. Marketing, Stock, Hr. Marketing module has taken care of Inquiry, Feasibility and stock maintain raw material, dispatch material. Hr have employee activity.
